

External filter technology

Universal Filter external

- 100% water yield: therefore, ideal for smaller roof areas
- Continuously variable installation depth of 570mm - 1050mm (22.4 - 41.3") using the telescopic dome shaft
- Plastic cover for standing upon or cast iron cover for vehicles to drive over
- Lockable, childproof cover
- Flush with ground level
- Minimal height offset (270mm/10.6") between the inlet and outlet
- Also suitable for infiltration and pond systems
- Maximum roof surface area of 350sqm with connection DN 100 and 500sqm with DN 150

Filter insert

- Sieve insert mesh width 0.35mm (0.01")
- Convenient extraction using the integrated handle
- Easy clean due to the smooth sieve structure

Pot filter

For installation at ground level (under ground tank inflow) before the cistern. Good value alternative - suitable when only used for garden irrigation, ponds or infiltration. Dimensions: 570mm Ø, 330mm high
